

## LSH VPN Connectivity

This document will cover how to connect to the LSH VPN in order to work from home.

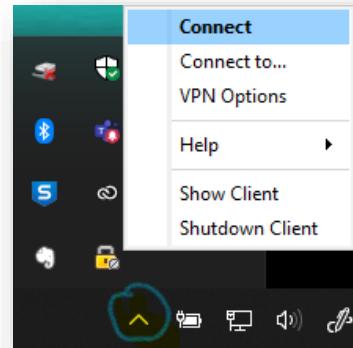

Not all staff have access to VPN in order to work from home. If you require access to work from home please submit a ticket to [helpdesk@lshauto.com.au](mailto:helpdesk@lshauto.com.au) with approval from your direct manager and dealer principal.

## Connecting VPN

The Checkpoint VPN Software is generally running in the background. You should be able to find it by clicking on the Arrow > look for the Padlock > Right click the padlock > click on Connect

Enter your Username and Password. Note: This is the same as your computer. (All Victorian and users post July 2019 the same as your eraPower credentials)

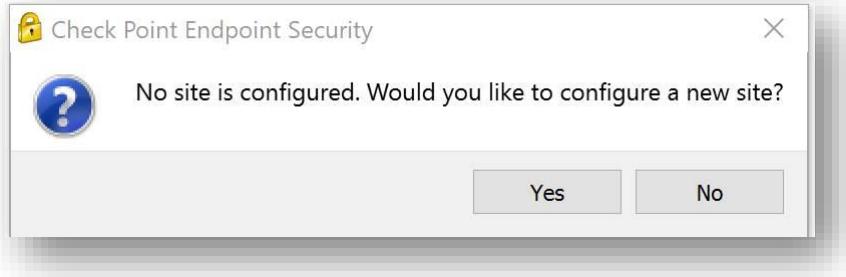

Enter the code that is sent to you via the Authenticator App/Text/Call.

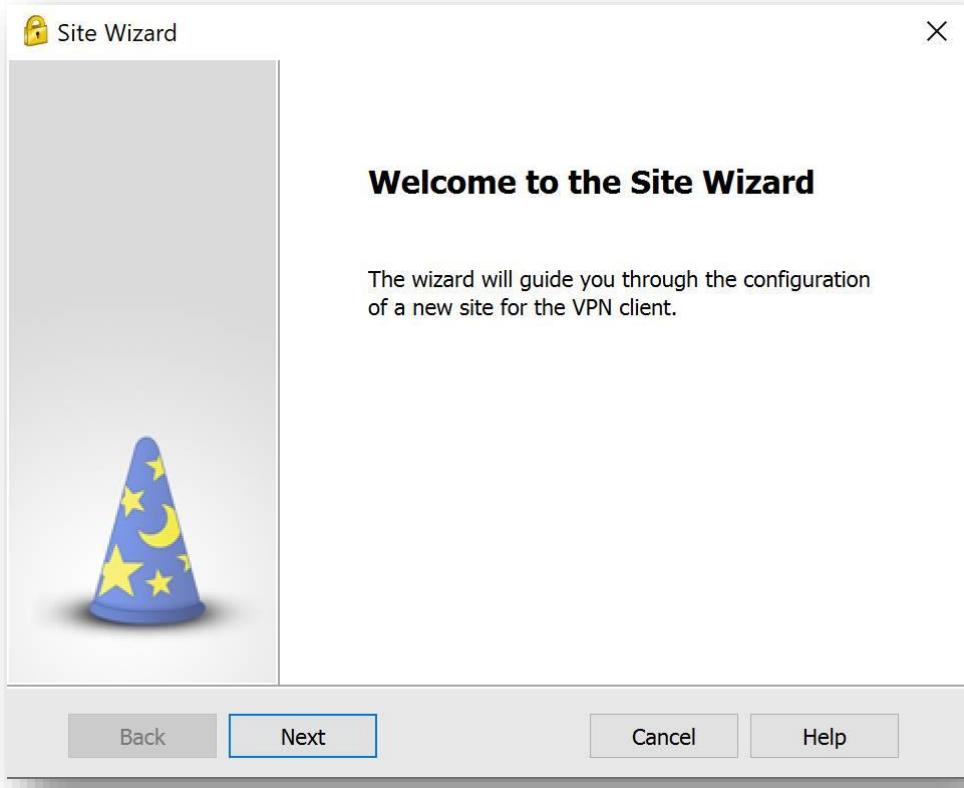

## Setting up VPN

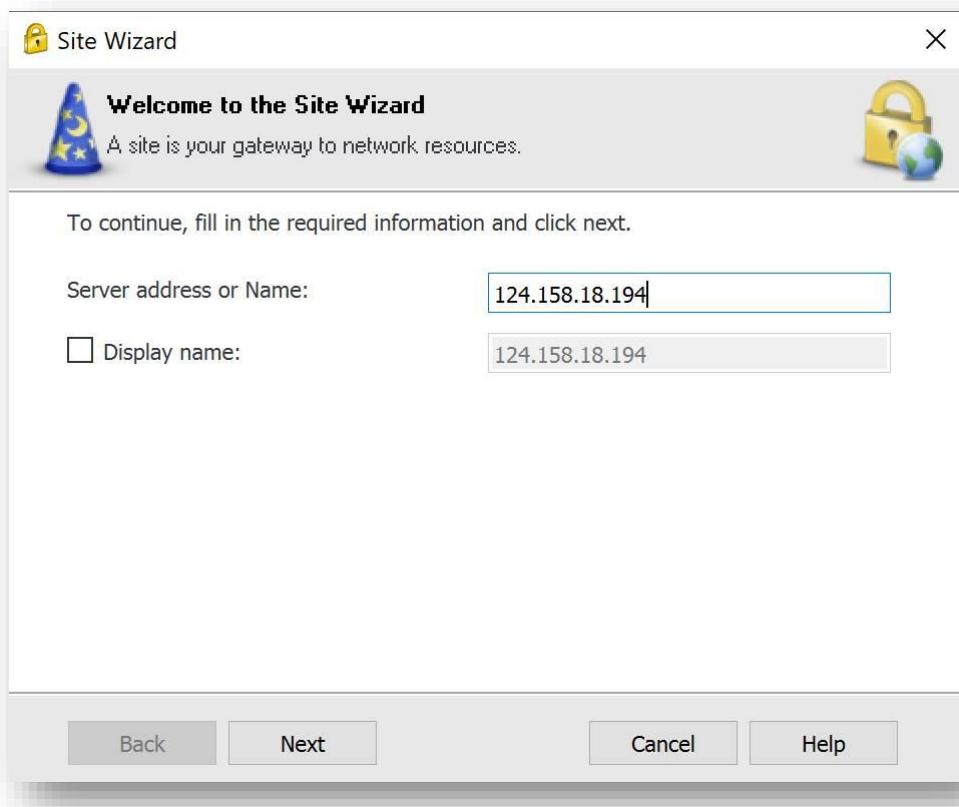

If you get the below message it means that the VPN software hasn't been configured on your device. Please click on Yes to proceed.

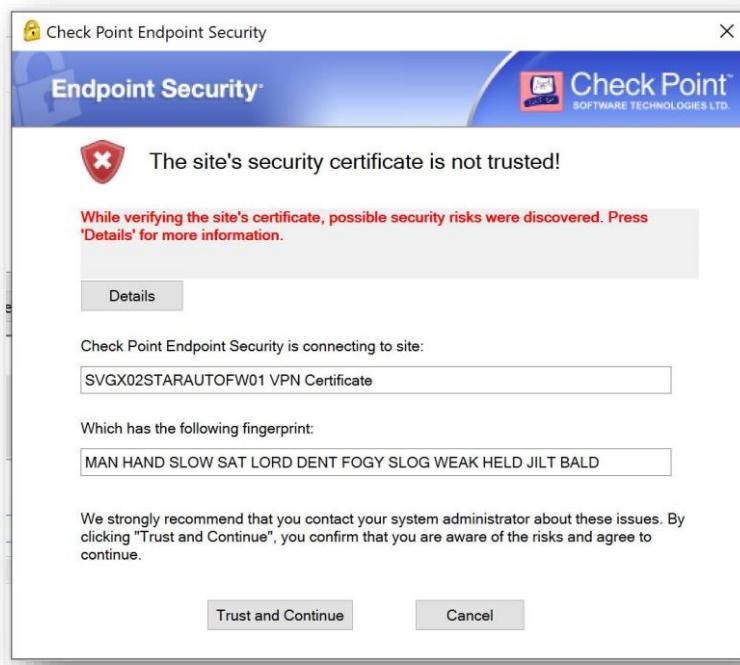

Click on Next

In the server address or name field type: 124.158.18.194 and click Next

Click on Trust and Continue

Click on Finish
